Rental LED Display

Can be widely used event shows, TV shows touring, XR LED wall Virtual production, concerts, concerts etc.

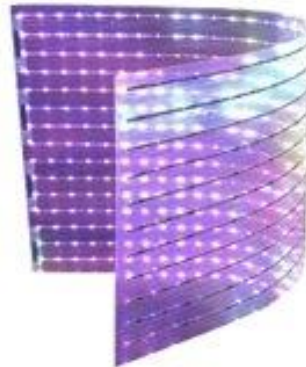

Fine Pitch LED Displays

Ultra-high CNC precision die-cast aluminum housing and Available in wall mounting or ground stacking installations.

LED Mesh Screen

Flexibility, and lightweight; It is straightforward to make a flat screen or curved to match with irregularly shaped building facade, suitable for various installations.

Transparent LED Film

Innovative technology allowing you to turn your window into a digital billboard, which is suitable for advertising all products and services.

Flexible LED Screen

It can be widely used for creative designed, studio, cylinder, sphere and any place need to realize some eye catching applications.

Transparent LED Film Application

Transparent

It's a game-changer in the industry, without visible frame and bars in the middle of the screen, which provides high visual transparency at 90% when glued onto a glass wall.

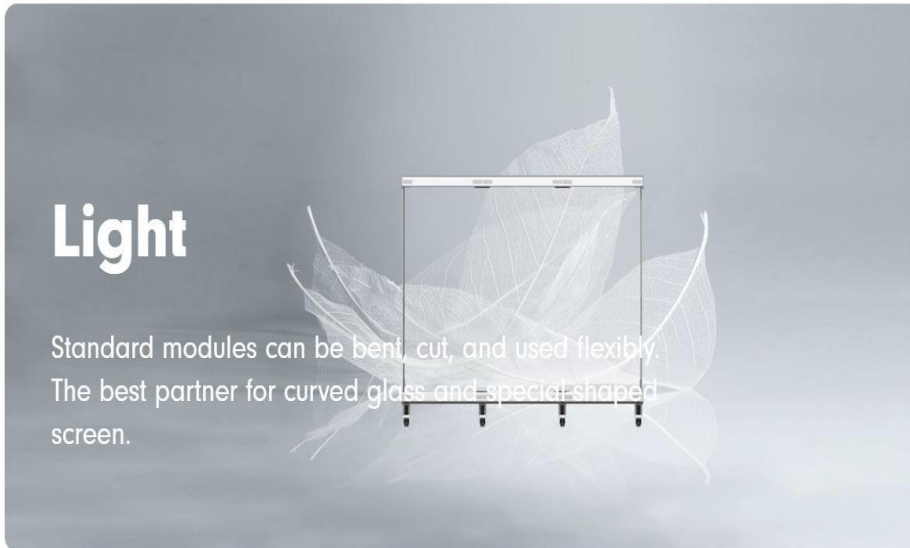

Flexible

Screen thickness Standard modules can be bent, cut, and used flexibly. The best partner for curved glass and special-shaped screen.

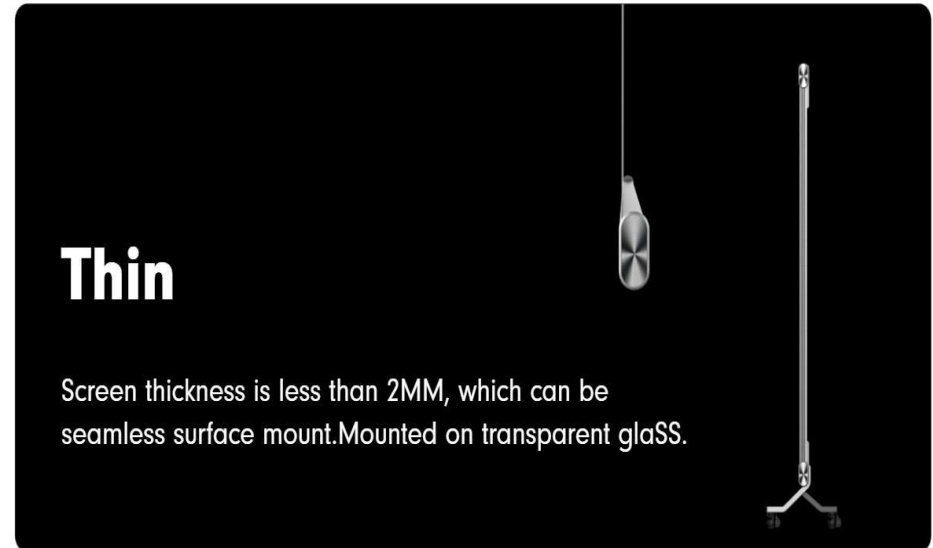

Light

Standard modules can be bent, cut, and used flexibly. The best partner for curved glass and special-shaped screen.

Thin

Screen thickness is less than 2MM, which can be seamless surface mount. Mounted on transparent glass.

Transparent LED Film

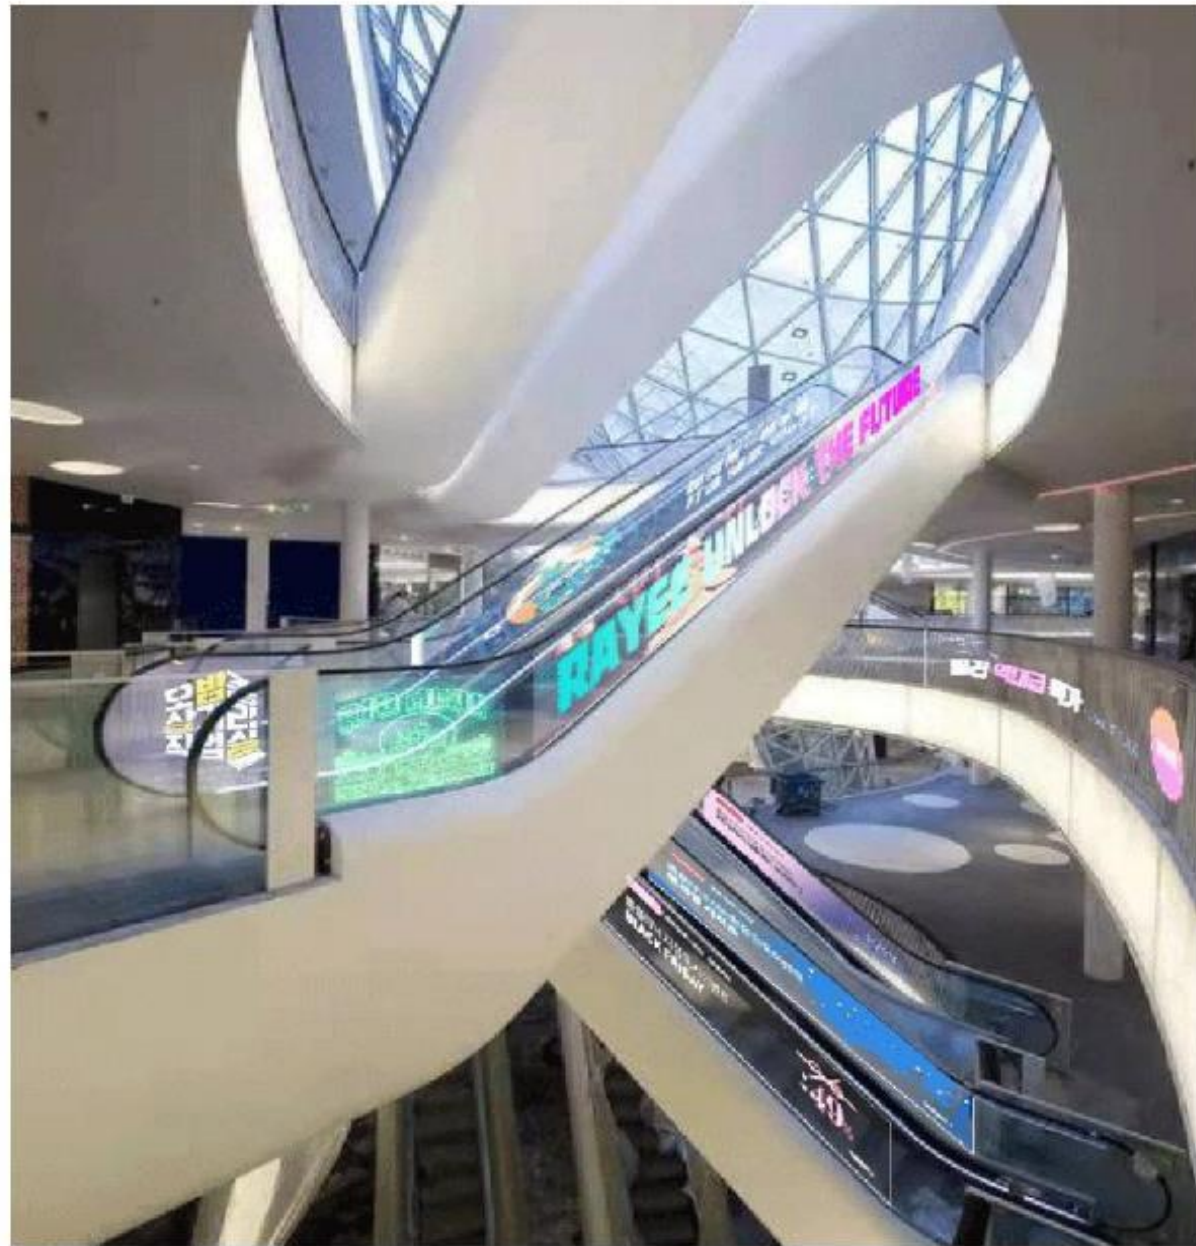

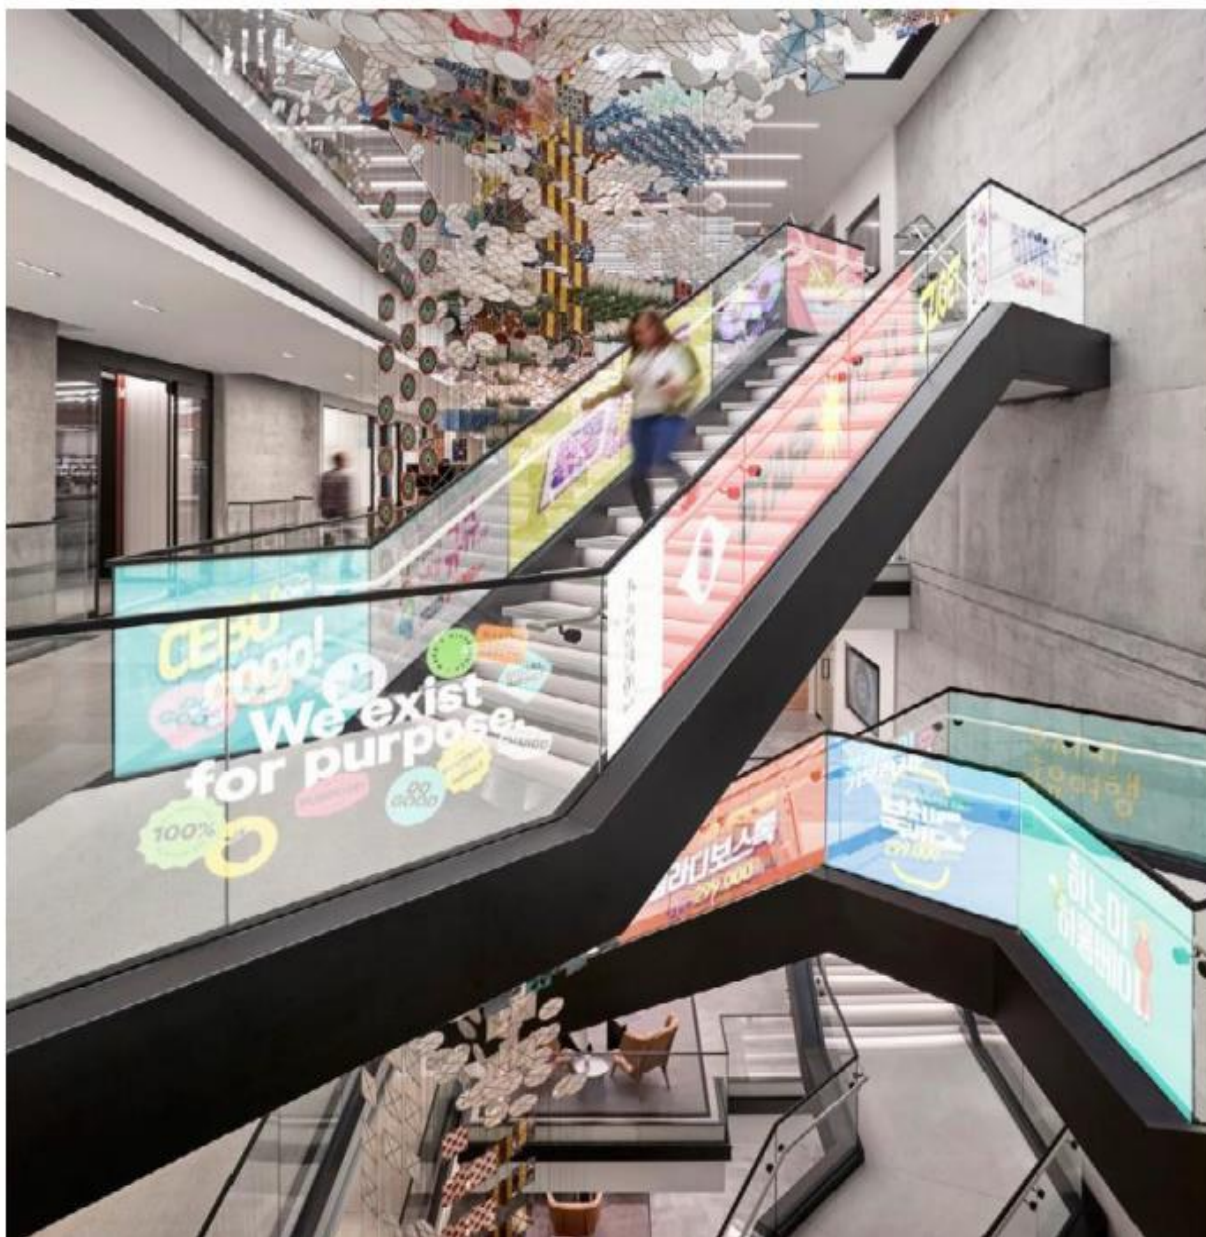

Applied Directly to Glass

High-end materials that are extremely clear, thin, and resistant to high temperatures are employed in the construction of the Transparent LED Film. With a meticulous design, the board achieves up to 90% transparency. The screen body, which does not require a structural skeleton, can be seamlessly assembled horizontally and vertically, reaching display dimensions of 2.4 meters in height or width. This versatile LED film is ideal for commercial windows, glass curtain walls, and various indoor and outdoor settings.

Transparent LED Film

is a cutting-edge solution for all your indoor signage needs. With its thin, flexible, and self-adhesive tiles, this LED screen is easy to install and customize to your unique specifications. Its high-resolution display and versatile design make it perfect for a wide range of applications, from retail displays to trade shows and exhibitions. Plus, its ultra-thin profile ensures that it seamlessly integrates with any environment, while still providing stunning, vibrant visuals.
